

# Features

**PIRANHA** offers 3 rotors to choose from: 2" Sabre tooth rotor, 1 3/4" aggressor tooth carbide rotor (which is 50% more aggressive, takes 25% less power) and the construction/processing rotor (excellent for laying down gravel and small rock removal).

**Aggressor Carbide Tooth**

**Sabre Tooth COMPOSITE METAL**

**Processing Rotor**

**Flip-Up Gauge Wheels** Choose either tilling mode or landscaping mode. NORTEC industry changing feature; Used in the "down" position, provides even performance. Use in the "up" position for more aggressive action. Gain precious storage space on trailers, in sheds or warehouses by storing or transporting with gauge wheels in the "up" position. The "up" position allows easier trailer loading.

**Posi-Lock Wheel Adjusters** Quick and easy. Simply move the spacer to the top or bottom position to achieve the proper setting.

**Quick-Flip Side Shields** Easy-Up/Easy Down. As simple as pulling a pin and flipping up the side shields. No need to remove and possibly lose the shields, just flip them up and windrow the rock and debris off to the side.

**Manual Angle** Standard Equipment  
Straight, left or right. Just flip up the side shields and windrow the rock and debris.

**Rugged Chain Drive and Dry Chain Case**  
The Piranha features an environmentally friendly dry chain case. Experience clean, low maintenance operation with NO leaky oil. Easy to service, just remove the cover and, because there's no oil to contend with, you can do your inspection and you're back to work.

## Material Shield Ski/Shoe/Runner

The runner will help guide the shields up and over that problem area. Without the runner, the material shield could hook a root or ledge rock and possibly damage the side shield. In an area where there's a possibility of puncturing a tire, just flip up the gauge wheels and operate on the runners. This is a great feature on track machines because the track is able to provide a level surface vs. a wheel-driven unit. In some cases, running on the runners is the preferred method of operation.

**NORTEC Exclusive**

### Piranha Uses

- Soil Conditioning
- Rock Removal
- Seedbed Preparation
- Pulverizing
- Landscaping
- Setting Grade
- Trenching
- Backfilling
- Leveling
- Grading

### Piranha Markets

- Landscaping
- Landscape Contractors
- Construction Sites
- Horse Farms
- Athletic Grounds
- Building Contractors
- Golf Courses
- Golf Course Builders
- Grading Contractors
- Home Builders
- Property Management
- Public Schools
- Race Tracks
- Rental Stores
- Trenching Companies
- Utility Companies
